## EXPERIENCE

SR. IOS ENGINEER, PERCOLATE; NY, NY – 2013-PRESENT

- Built iOS applications from the ground up for distribution into the App Store.
- Improved the quality of our application by adding unit tests to our workspace.
- Converted the Percolate app from Objective-C to Swift.
- Reduced our CCI build time by ~50% by adjusting build settings as well as the circle.yml.
- Improved development process by automating key aspects of our daily process. Some of these include: The parsing of our style.css file to generate a Swift font class that is used to add our icon font to the application. Code used to convert an events.txt file into code used to track application events.
- Provisioning profile & certificate management.

SR. IOS ENGINEER, FUELED; NY, NY – 2012-2013

- Built iOS applications from the ground up for distribution into the App Store.
- Assisted in the distribution of labor for user stories in Pivotal Tracker & JIRA.
- Assisted in the supervision of three iOS developers in the production of the Picture Equality app.

IOS ENGINEER, RESOLUTE DIGITAL; NY, NY – 2010-2012

- Built iOS applications from the ground up for distribution into the App Store.
